

**CMS Extends Electronic Prescribing Exemption for Computer Generated Faxes**

**Source: NCPA**

**Publication date: 2008-11-08**

After receiving feedback from pharmacies and others in industry regarding the economic and workflow impact of removing the electronic prescribing computer-generated fax exemption, CMS has extended the exemption.

However, CMS will eliminate the reinstated exemption for computer-generated facsimiles in all instances other than transient/temporary network transmission failures when the MIPPA e-prescribing program disincentives take effect on January 1, 2012.
